NOTICE OF INTENTION
TO TAKE DEPOSITION BY WRITTEN QUESTIONS

To Plaintiffs by and through their attorney of record: Christopher J. Gale
To other party/parties by and through their attorney of record: Michael David Siemer

You will please take notice that fourteen (14) days from the service of a copy hereof with attached questions, a deposition by written questions will be taken of the Custodian of Records for:

(PLEASE REFER TO THE ENTITIES REFERENCED ON THE ATTACHED EXHIBIT "A" LOCATION LIST)

before a Notary Public for Gulfstream Legal Group, LLC
 1300 Texas St., Houston, TX 77002
 Ph: 713-237-4700 // Fax: 888-559-7431

or its designated agent, which deposition with attached questions may be used in evidence upon the trial of the above-styled and numbered cause pending in the above-named court. Notice is further given that request is hereby made as authorized under Rule 45, Federal Rules of Civil Procedure, to the officer taking this deposition to issue a subpoena duces tecum and cause it to be served on the witness to produce any and all records as described on the attached questions and/or Exhibit(s) and any other such record in the possession, custody or control of the said witness, and every such record to which the witness may have access, pertaining to:

Pierre Abernathy (DOB: 12/08/1980)

and to turn all such records over to the officer authorized to take this deposition so that photographic reproductions of the same may be made and attached to said deposition.

Mr. N. Mark Ralls
State Bar No. 16489200
Hoblit Ferguson Darling LLP
Bank of America Plaza
300 Convent Street, Suite 1450
San Antonio, TX 78205

SUBPOENA IN A CIVIL CASE

vs.

Civil Action No. 5:13-CV-0700-FB

CITY OF SAN ANTONIO, TEXAS, ET AL.

WESTERN DISTRICT OF TEXAS

**SUBPOENA TO PRODUCE DOCUMENTS, INFORMATION, OR OBJECTS
 OR TO PERMIT INSPECTION OF PREMISES IN A CIVIL ACTION**

TO THE CUSTODIAN OF RECORDS FOR:
 Bexar County Medical Examiner's Office
 7337 Louis Pasteur, San Antonio, TX 78229

Production: YOU ARE COMMANDED to produce at the time, date, and place set forth below the following documents, electronically stored information, or objects pertaining to Pierre Abernathy (DOB: 12/08/1980), and permit their inspection, copying, testing, or sampling of the material. You are further commanded to certify that each document or documents produced complies with Fed. R. Evid. 803(6)(A)-(C).

ANY AND ALL AUTOPSY RECORDS AND PHOTOGRAPHS PERTAINING TO PIERRE ABERNATHY (DATE OF DEATH: 08/04/2011), including but not limited to any and all medical records; any and all reports (including but not limited to investigative reports, autopsy reports, pathology reports, laboratory reports, toxicology reports and medical examiner's reports); photographs (please provide in native format if possible); files; papers; notes; memoranda; correspondence; printouts of any type of data stored in electronic format, including email transmissions; and any other type of records and/or documentation contained in the file, whether generated from your office or elsewhere

Place:
 The office of the custodian: 7337 Louis Pasteur, San Antonio, TX 78229

Date and Time:
 03/17/2014 at 10:00 a.m.

Inspection of Premises: YOU ARE COMMANDED to permit entry onto the designated premises, land, or other property possessed or controlled by you at the time, date, and location set forth below, so that the requesting party may inspect, measure, survey, photograph, test, or sample the property or any designated object or operation on it.

Place:
 The provisions of Fed. R. Civ. P. 45(c), relating to your protection as a person subject to a subpoena, and Rule 45 (d) and (e), relating to your duty to respond to this subpoena and the potential consequences of not doing so, are attached.

Federal Rule of Civil Procedure 45 (e), (d), and (c) (Effective 12/1/07)

(c) PROTECTING A PERSON SUBJECT TO A SUBPOENA.

(1) Avoiding Undue Burden or Expense; Sanctions. A party or attorney responsible for issuing and serving a subpoena must take reasonable steps to avoid imposing undue burden or expense on a person subject to the subpoena. The issuing court must enforce that duty and impose an appropriate sanction — which may include lost earnings and reasonable attorney's fees — on a party or attorney who fails to comply.

(2) Command to Produce Materials or Permit Inspection.

(A) Appearance Not Required. A person commanded to produce documents, electronically stored information, or tangible things, or to permit the inspection of premises, need not appear in person at the place of production or inspection unless also commanded to appear for a deposition, hearing, or trial.

(B) Objections. A person commanded to produce documents or tangible things or to permit inspection may serve on the party or attorney designated in the subpoena a written objection to inspecting, copying, testing or sampling any or all of the materials or to inspecting the premises — or to producing electronically stored information in the form or forms requested. The objection must be served before the earlier of the time specified for compliance or 14 days after the subpoena is served. If an objection is made, the following rules apply:

(i) At any time, on notice to the commanded person, the serving party may move the issuing court for an order compelling production or inspection.

(ii) These acts may be required only as directed in the order, and the order must protect a person who is neither a party nor a party's officer from significant expense resulting from compliance.

(3) Quashing or Modifying a Subpoena.

(A) When Required. On timely motion, the issuing court must quash or modify a subpoena that:

(i) fails to allow a reasonable time to comply;

(ii) requires a person who is neither a party nor a party's officer to travel more than 100 miles from where that person resides, is employed, or regularly transacts business in person — except that, subject to Rule 45(e)(3)(B)(ii), the person may be commanded to attend a trial by traveling from any such place within the state where the trial is held;

(iii) requires disclosure of privileged or other protected matter, if no exception or waiver applies;

(iv) subjects a person to undue burden.

(B) When Permitted. To protect a person subject to or affected by a subpoena, the issuing court may, on motion, quash or modify the subpoena if it requires:

(i) disclosing a trade secret or other confidential research, development, or commercial information;

(ii) disclosing an unretained expert's opinion or information that does not describe specific occurrences in dispute and results from the expert's study that was not requested by a party; or

(iii) a person who is neither a party nor a party's officer to incur substantial expense to travel more than 100 miles to attend trial.

(C) Specifying Conditions as an Alternative. In the circumstances described in Rule 45(e)(3)(B), the court may, instead of quashing or modifying a subpoena, order appearance or production under specified conditions if the serving party:

(i) shows a substantial need for the testimony or material that cannot be otherwise met without undue hardship; and

(ii) ensures that the subpoenaed person will be reasonably compensated.

(d) DUTIES IN RESPONDING TO A SUBPOENA.

(1) Producing Documents or Electronically Stored Information. These procedures apply to producing documents or electronically stored information:

(A) Documents. A person responding to a subpoena to produce documents must produce them as they are kept in the ordinary course of business or must organize and label them to correspond to the categories in the demand.

(B) Form for Producing Electronically Stored Information Not Specified. If a subpoena does not specify a form for producing electronically stored information, the person responding must produce it in a form or forms in which it is ordinarily maintained or in a reasonably usable form or forms.

(C) Electronically Stored Information Produced in Only One Form. The person responding need not produce the same electronically stored information in more than one form.

(D) Inaccessible Electronically Stored Information. The person responding need not provide discovery of electronically stored information from sources that the person identifies as not reasonably accessible because of undue burden or cost. On motion to compel discovery or for a protective order, the person responding must show that the information is not reasonably accessible because of undue burden or cost. If that showing is made, the court may nonetheless order discovery from such sources if the requesting party shows good cause, considering the limitations of Rule 26(b)(2)(C). The court may specify conditions for the discovery.

(2) Claiming Privilege or Protection.

(A) Information Withheld. A person withholding subpoenaed information under a claim that it is privileged or subject to protection as trial-preparation material must:

(i) expressly make the claim; and

(ii) describe the nature of the withheld documents, communications, or tangible things in a manner that, without revealing information itself privileged or protected, will enable the parties to assess the claim.

(B) Information Produced. If information produced in response to a subpoena is subject to a claim of privilege or of protection as trial-preparation material, the person making the claim may notify any party that received the information of the claim and the basis for it. After being notified, a party must promptly return, requester, or destroy the specified information and any copies it has; must not use or disclose the information until the claim is resolved; must take reasonable steps to retrieve the information if the party disclosed it before being notified; and may promptly present the information to the court under seal for a determination of the claim. The person who produced the information must preserve the information until the claim is resolved.

(e) CONTEMPT.

The issuing court may hold in contempt a person who, having been served, fails without adequate excuse to obey the subpoena. A nonparty's failure to obey must be excused if the subpoena purports to require the nonparty to attend or produce at a place outside the limits of Rule 45(c)(3)(A)(ii).

ANY AND ALL AUTOPSY RECORDS AND PHOTOGRAPHS PERTAINING TO PIERRE ABERNATHY (DATE OF DEATH: 08/04/2011), including but not limited to any and all medical records; any and all reports (including but not limited to investigative reports, autopsy reports, pathology reports, laboratory reports, toxicology reports and medical examiner's reports); photographs (please provide in native format if possible); files; papers; notes; memoranda; correspondence; printouts of any type of data stored in electronic format, including email transmissions; and any other type of records and/or documentation contained in the file, whether generated from your office or elsewhere

1. Please state your full name.

Answer: JASON Gaines

2. Please state by whom you are employed and the business address.

Answer: BEXAR County Medical Examiners Office - 7337 Louis Pasteur SA, TX 78229

3. What is the title of your position or job?

Answer: Office Assistant III

4. Are these memoranda, reports, records, or data compilations outlined in the subpoena duces tecum pertaining to the above-named person in your custody or subject to your control, supervision or direction?

Answer: Yes

5. Are you able to identify these aforementioned records as the originals or true and correct copies of the originals?

Answer: Yes

6. Please hand to the Officer taking this deposition copies of the memoranda, reports, records, or data compilations mentioned in Question No. 4. Have you complied? If not, why?

Answer: yes

7. Are the copies which you have handed to the Officer taking this deposition true and correct copies of such memoranda, reports, records or data compilations?

Answer: yes

8. Were such memoranda, reports, records, or data compilations kept in the regular course of business of this facility?

Answer: yes

9. Was it in the regular course of business of this facility for a person with knowledge of the acts, events, conditions, opinions or diagnoses recorded to make the record or to transmit information thereof to be included in such record?

Answer: yes

10. Were the entries on these records made at or shortly after the time of the transaction recorded?

Answer: yes

11. Was the method of preparation of these records trustworthy?

Answer: yes

WITNESS (Custodian of Records)

Before me, the undersigned authority, on this day personally appeared the witness, known to me to be the person whose name is subscribed to the foregoing instrument in the capacity therein stated, who being first duly sworn, stated upon his/her oath that the answers to the foregoing questions are true and correct. I further certify that the records attached hereto are exact duplicates of the original records.

SWORN TO AND SUBSCRIBED before me this 11th day of March, 20 14.

DATE/TIME OF INCIDENT-ILLNESS-DISCOVERY : 8/4/2011 2:52	PLACE OF INCIDENT : Street
LOCATION OF INCIDENT-ILLNESS-DISCOVERY : 10800 Block Deep Water Bay, San Antonio, TX 78251	
CIRCUMSTANCES OF INCIDENT : On 08-04-2001 around 0330 hours, the deceased was involved in a police chase through San Antonio. The chase ended at the 10800 Blk of Deep Water Bay when the deceased's exited his vehicle. The deceased was reportedly being combative but was non-verbal. Several SAPD Officer were reportedly involved in the physical altercation and the deceased was also reportedly Tased more than once. The deceased was reportedly still struggle with officers when he became unresponsive.	
SA: EMS personnel worked on the deceased at the scene and transported the deceased to Christus Santa Rosa Westover Hills. The deceased was admitted to the ER at 0422 hours with the diagnosis of full arrest and was pronounced a few minutes later. Hospital staff reported the deceased had several apparent contusions and abrasion to his face, head, neck, torso, hips, and legs.	
SAPD evidence personnel processed the deceased's at the hospital and collected his clothing. During the clothing collection it was noted two apparent Taser probes were found in the deceased's shirt and another probe was noted still embedded in the deceased's back. SAPD evidence personnel collected the clothing with the two probes and were informed to leave the probe that was still in the deceased's back.	
SAPD Homicide is handling the investigation. Very little information was known about the incident (ie: timeline, positions, and/or restraints) at the time of the death report but SAPD is still in the process of the investigation.

INVESTIGATOR ADDENDUM			
SEARCHED	INDEXED	FILED	REVIEWED
Jimmy Holguin, #100	8/5/2011	No	No
<i>I obtained the NOK info from Det Hines. I then called the NOK to obtain info concerning a possible recent hospital visit by the dec and also obtain any med hx and PCP info. Awaiting a callback from the NOK.</i>			
Jimmy Holguin, #100	8/5/2011	No	No
<i>The NOK returned my call and I asked her several questions about the dec's med hx. She said the dec was in the UH in Dec and Feb, both times for being tasered by the police. She said the dec sustained head injuries and had an MI during the Dec visit and was on dialysis. She said the dec had a vasectomy recently, maybe two weeks ago, but she didn't remember which hospital he went to. She also could not remember the dec's PCP name. She said the dec quit going to the PCP when his insurance ran out.</i>			
Jimmy Holguin, #100	8/5/2011	No	No
<i>I called UH medical records and spoke to Linda. I requested her to get the dec's med recs for the Dec and Feb visits. She found them in her computer and said she would get them for us.</i>			
Misty J. Torres, #125	8/5/2011	No	No
<i>Det R Hines stated that one other taser probe had been found at the scene making a total of five that have been accounted for.</i>			
Misty J. Torres, #125	8/5/2011	No	No
<i>Fingerprints faxed to DPS at 1430 hrs.</i>			
Misty J. Torres, #125	8/5/2011	No	No
<i>Received UH records and taken to Dr Molina's office by intern.</i>			
Meghan Ryan, #123	8/5/2011	No	No
<i>DPS confirmed ID and the hit was on the dec's SID number. Number placed on the case update screen and id info updated on ID screen.</i>			
Jackie L. Harkey, #127	8/6/2011	No	No
<i>Mrs. Abrenathy a cousin of the decedent is in town from Virginia and will be assisting the family with making funeral arrangements. She will be contacting Det. Hines and the MEO once she reaches her family members. I advised her of our policy with NOK release from the funeral home. She stated the NOK, the mother, is in the hospital under sedation due to her emotional state regarding the death of the decedent. Mrs. Abernathy will contact the MEO with any further information.</i>			
Faustino Ruiz	8/11/2011	No	No
ADDED MIDDLE NAME PER DC ONLINE

LOCATION OF INCIDENT-ILLNESS-DISCOVERY : 10800 Block Deep Water Bay, San Antonio, TX 78251		
CIRCUMSTANCES OF INCIDENT : On 08-04-2001 around 0330 hours, the deceased was involved in a police chase through San Antonio. The chase ended at the 10800 Blk of Deep Water Bay when the deceased's exited his vehicle. The deceased was reportedly being combative but was non-verbal. Several SAPD Officer were reportedly involved in the physical altercation and the deceased was also reportedly Tased more than once. The deceased was reportedly still struggle with officers when he became unresponsive.		
SA EMS personnel worked on the deceased at the scene and transported the deceased to Christus Santa Rosa Westover Hills. The deceased was admitted to the ER at 0422 hours with the diagnosis of full arrest and was pronounced a few minutes later. Hospital staff reported the deceased had several apparent contusions and abrasion to his face, head, neck, torso, hips, and legs.		
SAPD evidence personnel processed the deceased's at the hospital and collected his clothing. During the clothing collection it was noted two apparent Taser probes were found in the deceased's shirt and another probe was noted still embedded in the deceased's back. SAPD evidence personnel collected the clothing with the two probes and were informed to leave the probe that was still in the deceased's back.		
SAPD Homicide is handling the investigation. Very little information was known about the incident (ie: timeline, positions, and/or restraints) at the time of the death report but SAPD is still in the process of the investigation.

BODY RECEIPT

By signing below, I attest that I have confirmed the identity of the decedent and property to be the same as the case number listed above by:

- Checking the decedent's arm band (if present) for the Bexar County Medical Examiner's Office case number and verifying that it matches the case number listed above;
- Placing additional arms bands (as required) on the decedent and verifying that the Bexar County Medical Examiner's Office case number matches any previous arm bands and the number listed above; and
- Confirming that the case number on any additional items received matches the numbers above.

RECEIVED BY: Stephanie Rivas

DATE: 8/4/2011 @ 11:20:00 AM

By signing below, I attest that I have confirmed the identity of the decedent and property to be the same as the case number listed above by:

- Confirming that the case number listed on this form and on the arm bands is the case number reported to me by the Bexar County Medical Examiner's Office at the time of dispatch and/or pick up.
- Checking the decedent's arm band (if present) for the Bexar County Medical Examiner's Office case number and verifying that it matches the case number listed above;
- Checking any additional arms bands (as required) placed on the decedent at the Bexar County Medical Examiner's Office and verifying that the Bexar County Medical Examiner's Office case number matches any previous arm bands and the number listed above.

AUTOPSY REPORT

Case No. 2011-1404

Name: Pierre Tourell Abernathy **Age:** 30 **Race:** B **Sex:** M

Date & Time of Autopsy: 5 Aug 2011 @ 9:45 a.m.

GENERAL EXAMINATION

The body is received lying upon multiple hospital sheets and is that of a normally developed, well nourished, adult male, measuring 71 inches in length, weighing 240 lbs and appearing consistent with the listed age of 30 years. The body is nude. An orange identification band surrounds the right ankle and a hospital identification band surrounds the left wrist.

Accompanying the body are five tubes of antemortem blood all of which are dated 4 August 2011.

Detective Randall Hines from the San Antonio Police Department is present for the autopsy.

EXTERNAL EXAMINATION

The body is not embalmed. Rigor mortis is fully developed in all joints. Fixed livor mortis is present posteriorly. Significant changes of decomposition are absent.

The decedent has short, black, curly scalp hair averaging 1 inch in length. A thin beard and mustache are present. The eyes are closed; the conjunctivae are pale; the sclerae are white; the corneae are clear; and the irides are brown. The nares are patent. The ears are normal in location and formation. A punctate scar involves the left earlobe consistent with remote ear piercing. The facial bones are intact to palpation. The mouth is closed. The teeth are natural and in good condition. An apparent dirt-type material is present between the teeth and within the mouth.

The neck and chest are symmetrical. *Jihad* is tattooed across the right lateral neck. Small linear scars involve the right medial neck. The abdomen is soft.

Abernathy, Pierre Tourea

Case No. 2011-1404

The upper and lower extremities, including the hands and feet, are symmetrical. "Cherokee Reign" and an open hand with a feather are tattooed on the right lateral upper arm. A 4 x 1 cm irregular scar extends down the right proximal posterior forearm. The hands are dirty. The fingernails are short and intact. Small linear and irregular scars involve the anterior knees. A 10 x 1 cm scar extends obliquely across the right anterior lower leg. Two, 1 x 1 cm, scars involve the left anterior lower leg.

The external genitalia are those of a normal adult male and are atraumatic. The testes are palpated within the scrotal sac.

The back is straight. The anus is patent and unremarkable.

EVIDENCE OF MEDICAL INTERVENTION

An endotracheal tube protrudes the mouth and is taped in place. Cardiac monitor pads are present upon the anterior chest, abdomen, right anterior upper arm, and left anterior lower leg. Electrocardioversion pads are affixed to the right upper and left lateral chest. An interosseous catheter protrudes from the left anterior shoulder. A needle puncture wound involves the left antecubital fossa. A single lumen intravascular catheter is present within the right posterior hand.

EVIDENCE OF INJURY

Puncture Wounds

A 2 mm puncture wound involves the right anterior medial upper chest and incision reveals acute hemorrhage within the underlying subcutaneous tissues.

A 1 mm puncture wound is present upon the left lower back and is surrounded by a 2.5 mm curvilinear abrasion extending along the medial and inferior margins. The puncture wound is also associated with a 3 x 1 mm abrasion along its lateral margin. Located 3½ cm inferior to this puncture wound is a second puncture wound from which a 2½ cm in length by 5 mm in diameter gray metallic barb from an electromuscular device protrudes. The barb is removed to reveal a 1 cm in length by < 1 mm in thickness needle-like device with a small hook (barb) located 4 mm from the needle point. Upon removal of the barb from the wound the wound is found to consist of a central puncture wound surrounded by irregular abrasion measuring 4 x 4 mm in aggregate. Incision into the subcutaneous tissues beneath the wound reveals focal hemorrhage within the subcutaneous tissues.

A 2mm non-hemorrhagic puncture wound is present upon the left medial upper back. There is no associated abrasion and incision fails to reveal hemorrhage within the subcutaneous tissues.

Probable canine bite wounds

Upon the left buttock is a patterned injury consisting of a 9 mm laceration in line with four small abrasions measuring 5 x 2 mm, 3 x 2 mm, 2 x 2 mm, and 2 x 2 mm, respectively. Just inferior to this row is a second laceration measuring 1 cm in line with three superficial abrasions measuring 2 x 2 mm, 3 x 2 mm, and 2 x 2 mm, respectively. The entire wound is surrounded by a 4 x 4 cm red contusion.

Abernathy, Pierre Tourel

Case No. 2011-1404

Three, irregular, abraded lacerations involve the right upper buttock, measuring 2 x 2 cm, 1.5 x 0.5 cm, and 2 x 1 cm, respectively. The lacerations are associated with undermining of the subcutaneous tissues and are interconnected beneath the skin surface.

A patterned wound is present upon the right lower buttock consisting of a 6 x 2 mm laceration inline vertically with seven small abrasions measuring 2 mm, 5 mm, 5 mm, 3 mm, 4 mm, 5 mm, and 1.8 cm, respectively.

Blunt force injuries

Two abrasions involve the left lateral lower forehead and measure 4 x 0.3 cm in aggregate. Ecchymosis surrounds both eyes. There is confluent subconjunctival hemorrhage involving both orbital globes. A 3 cm abrasion/superficial laceration extends across the left lower eyelid. A 1 cm superficial laceration extends across the right lower eyelid. A 2 cm superficial laceration and a 1 cm abrasion extend across the left lateral lower cheek.

Scattered, transverse abrasions, averaging 1 cm in length, involve the left lateral neck. Three, small abrasions involve the right medial lower chest, measuring 2 x 2 mm, 3 x 2 mm, and 3 x 2 mm, respectively. A 7 mm abrasion extends across the left medial upper abdomen. Intersecting linear abrasions, ranging from 2 to 6 cm in length, span a 15 x 15 cm area upon the left lateral abdomen. A 2 cm abrasion extends down the medial lower abdomen/suprapubic region.

A 1 x 1 mm abrasion surrounded by erythema involves the right anterior upper arm adjacent to a 1 x 1 cm purple contusion. A 3 x 2 mm abrasion is present upon the proximal right anterior lateral forearm. Transverse abrasions, ranging from 1 to 2 cm in length, span a 4 x 2 cm area upon the right posterior upper arm. A 5 x 4 cm red contusion surrounds a 1.2 x 0.3 cm abrasion and a 1 cm linear abrasion upon the right lateral wrist. A 6 cm linear abrasion extends down the right medial palm.

Linear red contusions, ranging from 5 to 8 cm in length, extend down the distal left anterior-medial forearm. A 2 x 2 cm purple contusion involves the left medial wrist. A 2 x 0.5 cm abrasion surrounded by a purple contusion involves the left medial wrist. Scattered irregular and linear abrasions involve the distal left posterior upper arm and proximal left posterior forearm. A 1 x 1 cm confluent abrasion is present upon the distal left posterior upper arm and a 2 x 2 cm confluent abrasion involves the proximal left posterior forearm. A 7 cm abrasion extends across the left posterior forearm.

Incisions overlying the bony prominences of the wrists reveal hemorrhage within the medial and lateral subcutaneous tissues bilaterally.

Multiple abrasions involve the right anterior knee, measuring 1 x 1 cm, 3 x 2 cm, 1 x 1 cm, 1 x 1 cm, and 3 x 3 cm, proceeding in a clockwise manner. A 5 cm interrupted linear abrasion extends down the proximal right lateral lower leg. A 4½ x 0.3 cm interrupted abrasion extends down the right proximal anterior lower leg. An 8 x 1 cm abrasion extends down the right anterior mid lower leg. A 1.5 x 0.2 cm abrasion involves the distal right anterior lower leg. Scattered, small abrasions are present upon the right posterior thigh and are admixed with small purple contusions.

Abernathy, Pierre Tourea

Case No. 2011-1404

Scattered punctate and linear abrasions, ranging from 1 mm to 3 cm in length, span a 15 x 2 cm area on the proximal left anterior-lateral thigh. Scattered, small, superficial lacerations and abrasions involve the proximal left medial thigh. Scattered, small abrasions involve the left anterior knee. A 1 x 1 cm abrasion is present upon the proximal left anterior-lateral lower leg. A 1 x 0.5 cm abrasion extends across the left proximal anterior lower leg. A 9 x 10 cm purple contusion surrounds scattered irregular abrasions, ranging from 1 cm to 4½ cm in greatest dimension, upon the proximal left posterior-medial thigh. A cluster of small abrasions, measuring 6 x 4 cm in aggregate, involves the left posterior-lateral knee. A 3 x 2 cm purple contusion extends across the left posterior knee. An 8 x 6 mm oval, abraded laceration involves the proximal left posterior-lateral lower leg.

Incisions overlying the bony prominences of the ankles bilaterally fail to reveal evidence of subcutaneous hemorrhage.

Scattered transverse abrasions, averaging 1 cm in length, involve the posterior neck. A 5 x 1 cm linear red contusion extends obliquely across the left apical shoulder. A 4 x 0.7 cm linear red contusion involves the left upper back. A 6 x 3 cm oval purple contusion is present upon the left mid back. A 9 x 3 cm red contusion extends across the right upper back. A 10 x 4 cm irregular purple contusion involves the right mid back.

The left buttock is diffusely contused. Linear abrasions extend across the left upper buttock, measuring 4 cm and 6 cm, respectively. A 2 x 1 cm crusted abrasion extends vertically between these two linear abrasions. Scattered abrasions involve the left buttock averaging 1 cm in length. A 5 mm superficial laceration involves the left medial buttock.

A 1.5 x 1 cm irregular laceration involves the right medial buttock. Scattered, irregular, small abrasions involve the right buttock, averaging 1 cm in greatest dimension. A 3 x 2 mm superficial laceration involves the right mid buttock. A 6 cm superficial laceration extends across the right lower buttock. A 3 cm superficial laceration extends across the right gluteal margin.

Internal Injuries

Reflection of the scalp reveals a 3 x 3 cm focus of hemorrhage within the subcutaneous tissues of the left posterior lateral scalp, a 2 x 1 cm focus of subcutaneous hemorrhage within the left frontal scalp and a 3 x 3 cm focus of hemorrhage within the left frontal scalp. Confluent subgaleal hemorrhage, measuring 15 x 8 cm, underlies the right lateral scalp.

Sectioning of the tongue reveals confluent hemorrhage involving the lateral aspect.

Clothing

A cut short-sleeve black t-shirt with a *Spurs* logo and a gray sleeveless undershirt are supplied by Detective Hines from the San Antonio Police Department and are examined at the time of the autopsy. Examination of the t-shirt reveals a 1 x 1 mm defect within the upper right anterior-lateral portion, corresponding to the puncture wound upon the anterior medial chest. No defect is noted in the undershirt corresponding to this region.

Abernathy, Pierre Touret

Case No. 2011-1404

Three barbs for electromuscular devices, similar in appearance to the previously described barb recovered from the decedent's lower back, are embedded within the t-shirt. The 1st is located upon the right anterior-lateral portion of the shirt. This barb perforates both the outer t-shirt and the undershirt and corresponds in location to the small abrasions upon the right lower chest. The 2nd barb is embedded within the right lower anterior black t-shirt only and does not penetrate the underlying undershirt or correspond in location to any injuries on the body. The 3rd barb is located upon the right posterior lateral t-shirt and perforates both the t-shirt and undershirt but the tip of the barb is not exposed through the shirts. This barb does not definitively correspond to any injuries upon the body.

INTERNAL EXAMINATION

HEAD: An intermastoid incision is made around the cranium and the scalp is retracted. The cranial cavity is opened. There is no evidence of epidural, subdural or subarachnoid hemorrhage. The dura is smooth, tough and white and is removed to reveal no skull fractures to be present. The leptomeninges are transparent. The brain weighs 1,360 g. The cerebral and cerebellar hemispheres, midbrain and pons are symmetrical. On cut sections, the parenchyma is soft without evidence of infection, tumor or trauma. The cerebral vessels follow the usual distribution and are widely patent.

BODY: The body is opened with the Y-shaped incision. The organs occupy their usual positions and relationships. The pleural, pericardial and peritoneal cavities are free of abnormal fluid accumulations. Inspection of the thoracic and abdominal cavities after evisceration reveals no significant musculoskeletal abnormalities. The abdominal pannus averages 3 cm in thickness.

NECK: There is no evidence of infection, tumor or trauma. The hyoid bone and laryngeal cartilages are intact. The airway is patent without evidence of significant inflammation or neoplasia. No cervical dislocations or fractures are present.

CARDIOVASCULAR SYSTEM: The heart weighs 450 g and is grossly enlarged and globular in shape. The epicardial surface is smooth and glistening. The coronary arteries arise normally, follow a right dominant distribution and are small in caliber but free of significant arteriosclerotic changes. On cut sections, the endocardium is smooth and glistening and the myocardium is dark red and soft without evidence of significant fibrosis or neoplasia. The cardiac valves are thin, pliable, and normally formed. The aorta is open to reveal a tan, smooth, intima.

LUNGS: The right lung weighs 800 g and the left lung weighs 630 g. The pleural surfaces are purple, smooth and glistening. On cut sections, the parenchyma is congested and moderately edematous without evidence of infection, tumor or trauma. The pulmonary vessels and airways are unobstructed.

ALIMENTARY SYSTEM: The esophagus, stomach and small and large intestines reveal no evidence of significant natural disease or trauma. The stomach contains a minimal amount of thick, green material. The pancreas is normal in size and location and, fails to reveal evidence of significant fibrosis or neoplasia on cut sections.

HEPATOBILIARY SYSTEM: The liver weighs 2,190 g. The capsule is intact. On cut sections, the parenchyma is tan-brown and firm. There is no evidence of significant fibrosis or neoplasia. The gallbladder is present and unremarkable.

Abernathy, Pierre Touret

Case No. 2011-1404

ENDOCRINE SYSTEM: The thyroid and adrenal glands are normal in size, shape and location and are without significant abnormality on cut section.

LYMPHORETICULAR SYSTEM: The spleen weighs 170 g. The capsule is intact and the parenchyma is dark red and soft. Significant lymphadenopathy is not appreciated.

GENITOURINARY SYSTEM: The right kidney weighs 160 g and the left kidney weighs 150 g. The capsules remove without difficulty revealing smooth and shiny cortical surfaces. On cut sections, the parenchyma is tan-red with distinct cortico-medullary demarcations. The collecting systems, ureters and bladder are unremarkable. The bladder contains a moderate amount of urine. The prostate gland is present and unremarkable. The testes are exposed and fail to reveal evidence of trauma, neoplasia, or significant natural disease.

MICROSCOPIC EXAMINATION

Hematoxylin and eosin stained sections are reviewed. Sections of the heart (6), lungs (5), thyroid gland (1), kidneys (2), brain (2), and spleen (1) fail to reveal significant histopathologic findings. One liver section is remarkable for moderate steatosis. Two sections of skin from the puncture wounds upon the left lower back show extravasated red blood cells within the subcutaneous tissues. A focus of epidermal lysis with coagulation of the underlying dermis is seen.

ANCILLARY STUDIES

Fingernail clippings are obtained and the barb recovered from the left back is retained.

Abernathy, Pierre Toussaint

Case No. 2011-1404

FINDINGS

- I. Acute cocaine intoxication
 - A. Cocaine = 0.17 mg/L (antemortem blood)
 - B. Benzoylecgonine > 0.5 mg/L (femoral blood)
 - C. Clinical history of cocaine use
- II. Reported history of prolonged struggle
 - A. Reported history of physical altercation with police officers
 1. Abrasions and contusions of body
 2. Patterned injuries of buttocks consistent with canine bite wounds
 - B. Reported history of being struck with an electric muscular disruption device
 1. Puncture wounds of right anterior chest and left lower back
 2. Barb embedded within puncture wound of left lower back
 3. Barbs embedded within decedent's clothing
- III. Clinical history of two previous occasions of encounters with police including EMDD use while intoxicated with cocaine
 - A. Clinical history of cerebellar bleed (stroke), rhabdomyolysis, hypokalemia, acute kidney failure, myocardial infarct (2010)
 - B. Clinical history of rhabdomyolysis, hypokalemia, acute kidney failure (2011)
- IV. Cardiomyopathy (450 g)
- V. Reported history of schizophrenia without clinical history definitive medical diagnosis

Abernathy, Pierre Touren

Case No. 2011-1404

CONCLUSION

It is our opinion that Pierre Tourell Abernathy, a 30 year old male, died as a result of the combined effects of intoxication with cocaine, a prolonged struggle, and a cardiomyopathy (an enlarged heart).

MANNER OF DEATH: Homicide.
